DETAILED ACTION

Drawings

1. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(4) because reference characters "16" and "58" have both been used to designate "the stem". Applicant recites the stem in claims 2, 5-8, and 10-12. It is unclear to the examiner that the stem in the claims indicates the reference character "16" or the other reference character "58". Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1 and 6-9 are rejected under 35 U.S.C. 102(b) as being anticipated by Lin (US 6,039,463).

Art Unit: 2875

4. Re claim 1: Lin disclose a lamp having a base (2 in Fig. 1), a shade (3), and a coupler (6) between the base (2) and the shade (3) removably securing the shade (3) to the base (2).

Re claims 6-9: Lin discloses a coupler (6) including a head portion (63) of the coupler and a stem (64), and the head portion (63) includes a ring (5) unitary with the stem (64) and adapted abut against the interior of the shade (3). Lin discloses a cavity (the inside portion of 64) and a fastening member (8) of the stem.

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 2-5 and 10-12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lin (US 6,039,463) in view of J. G. Goody (US 1,890,378).

Re claims 2 and 10: Lin discloses a lamp having a base (2 in Fig. 1) including a neck (4) defining an interior cavity (42); a shade (3) seated over the neck (4) and including a lower circumferential opening (31) in the shade; and a ring (5) seated against the interior of the shade and including a stem (6) extending through the opening (31) defined in the shade and into the cavity (42) defined in the neck, the stem (6) being releasably secured to the base (2) for securing the shade (3) to the

Art Unit: 2875

base (2). Lin does not disclose a lip of the shade. However, it is conventional that a lampshade of a hurricane lamp has a circumferential lip portion in order to be seated and engaged in the base portion of the hurricane lamp, and J. G. Goody disclose the circumferential lip (9) of the shade (10). Therefore, it would have been obvious to one having ordinary skill in the art at the time the invention was made to modify Lin's lampshade to include a circumferential lip as J. G. Goody discloses.

Re claims 3 and 11: Lin discloses a threaded bore of the base (21) and a threaded screw of the coupler (8).

Re claims 4-5, 8, and 12: Lin discloses a circumferential cylindrical wall (61) of the stem of the coupler (6).
